PRESIDENT HARDING says of those who take their places:

"To maintain operation of the railroads in interstate commerce and the transportation of United States mails have necessitated the employment of men who choose to accept employment under the terms of the decision and who have the same indisputable right to work that others have to decline work."

THE U.S. R. R. LABOR BOARD, an impartial body created by Congress. says of such men:

"\*\*\* that they are not strikebreakers seeking to impose the arbitrary will of an employer on employes; that they have the moral as well as the legal right to engage in such service of the American public to avoid interruption of indispensable railway transportation, and that they are entitled to the protection of every department and branch of the Government,

It is understood assurances have been broadcasted by strikers that they will return with all seniority rating and previous privileges enjoyed. Let there be no misunderstanding about this: No man who has left our service on strike will be re-employed except as a new man, if re-employed at all, and no qualified man now or hereafter employed, who desires to remain in our service, will be displaced to make room for returning strikers.
